DOLLAR TREE STORES, INC.

AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements of Dollar Tree Stores, Inc. and its wholly-owned subsidiaries (the Company) have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and are presented in accordance with the requirements of Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto and management s discussion and analysis of financial condition and results of operations for the year ended January 31, 2004 contained in the Company s Annual Report on Form 10-K filed April 13, 2004. The results of operations for the 13 and 39 weeks ended October 30, 2004 are not necessarily indicative of the results to be expected for the entire fiscal year ending January 29, 2005.

In the Company s opinion, the unaudited condensed consolidated financial statements included herein contain all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of its financial position as of October 30, 2004 and the results of its operations and cash flows for the periods presented. The January 31, 2004 balance sheet information was derived from the audited consolidated financial statements as of that date.

Certain 2003 amounts have been reclassified for comparability with the current period presentation.

2. REVOLVING CREDIT FACILITY

In March 2004, the Company entered into a five-year Revolving Credit Facility (the Facility). The Facility provides for a $450.0 million revolving line of credit, including up to $50.0 million available for letters of credit, bearing interest at LIBOR, plus 0.475%. The Facility bears an annual facilities fee, calculated as a percentage, as defined, of the amount available under the line of credit and an annual administrative fee payable quarterly. The Facility, among other things, requires the maintenance of certain specified financial ratios, restricts the payment of certain distributions and prohibits the incurrence of certain new indebtedness. As of October 30, 2004, there was $250.0 million outstanding under this Facility.

The Company used availability under the Facility to repay $142.6 million of variable-rate debt and to purchase short-term, government-sponsored municipal bonds. The Company s $150.0 million revolving credit facility (Old Facility) was terminated concurrent with entering into the Facility. The net debt issuance costs related to the Old Facility and the variable-rate debt totaled $0.7 million and are included in other assets, net on the January 31, 2004 condensed consolidated balance sheet. These costs were charged to interest expense during the 39 weeks ended October 30, 2004. As a result of the repayment of the variable-rate debt, the $25.0 million, $10.0 million and $5.0 million interest rate swaps previously designated to the variable-rate debt were redesignated to new borrowings under the Facility. This redesignation does not affect the accounting methods used for the individual interest rate swaps.

Table of Contents

3. NET INCOME PER SHARE

The following table sets forth the calculation of basic and diluted net income per share:

	13 Weeks Ended		39 Weeks Ended	
(In thousands, except per share data)	**Oct. 30, 2004**	**Nov. 1, 2003**	**Oct. 30, 2004**	**Nov. 1, 2003**
Basic net income per share:				
Net income	$ 31,854	$ 36,161	$ 96,596	$ 97,755
Weighted average number of shares outstanding	112,890	115,038	113,411	114,599
Basic net income per share	$ 0.28	$ 0.31	$ 0.85	$ 0.85
Diluted net income per share:				
Net income	$ 31,854	$ 36,161	$ 96,596	$ 97,755
Weighted average number of shares outstanding	112,890	115,038	113,411	114,599
Dilutive effect of stock options (as determined by applying the treasury stock method)	483	1,389	693	919
Weighted average number of shares and dilutive potential shares outstanding	113,373	116,427	114,104	115,518
Diluted net income per share	$ 0.28	$ 0.31	$ 0.85	$ 0.85

For the 13 weeks ended October 30, 2004 and November 1, 2003, 1,957,889 and 172,359 stock options, respectively, are not included in the calculation of the weighted average number of shares and dilutive potential shares outstanding because their effect would be anti-dilutive. For the 39 weeks ended October 30, 2004 and November 1, 2003, 1,512,428 and 1,596,475 stock options, respectively, are not included in the calculation of the weighted average number of shares and dilutive potential shares outstanding because their effect would be anti-dilutive.

4. STOCK-BASED COMPENSATION

The Company currently applies the intrinsic value-based method of accounting prescribed by Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations in accounting for its fixed stock option plans. As such, compensation expense would be recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price. SFAS No. 123, Accounting for Stock-Based Compensation, established accounting and disclosure requirements using a fair value-based method of accounting for stock-based employee compensation plans. As allowed by SFAS No. 123, the Company has elected to continue to apply the intrinsic value-based method of accounting described above, and has adopted the disclosure requirements of SFAS No. 123.

Table of Contents

If the accounting provisions of SFAS No. 123 had been adopted, the Company s net income and net income per share would have been reduced to the pro forma amounts indicated in the following table:

	13 Weeks Ended		39 Weeks Ended	
(In thousands, except per share data)	**Oct. 30, 2004**	**Nov. 1, 2003**	**Oct. 30, 2004**	**Nov. 1, 2003**
Net income, as reported	$ 31,854	$ 36,161	$ 96,596	$ 97,755
Deduct: Total stock-based employee compensation determined under fair value based method, net of related tax effects	(3,296)	(3,178)	(9,979)	(10,027)
Net income for SFAS No. 123	$ 28,558	$ 32,983	$ 86,617	$ 87,728
Net income per share:				
Basic, as reported	$ 0.28	$ 0.31	$ 0.85	$ 0.85
Basic, pro forma for SFAS No. 123	$ 0.25	$ 0.29	$ 0.76	$ 0.77
Diluted, as reported	$ 0.28	$ 0.31	$ 0.85	$ 0.85
Diluted, pro forma for SFAS No. 123	$ 0.25	$ 0.28	$ 0.76	$ 0.76

These pro forma amounts for SFAS No. 123 may not be representative of future disclosures because compensation cost is reflected over the options vesting periods and because additional options may be granted in future periods.

On May 10, 2004, the Board of Directors granted options to employees under the Company s Equity Incentive Plan to purchase 1,513,400 shares of the Company s common stock at an exercise price of $25.26 per share. The exercise price represents the fair market value of the Company s stock at the date of grant. For pro forma disclosure purposes, the fair value of these newly granted options was calculated using the Black-Scholes option-pricing model with the following assumptions: expected term in years of 5.4; expected volatility of 59.8%; annual dividend yield of zero; and risk-free interest rate of 3.7%. Using these assumptions, the weighted fair value of options granted on May 10, 2004 was $14.13.

Table of Contents

5. SHAREHOLDERS EQUITY

Comprehensive Income

The Company s comprehensive income reflects the effect of recording derivative financial instruments pursuant to SFAS No. 133. The following table provides a reconciliation of net income to total comprehensive income:

	13 Weeks Ended		39 Weeks Ended	
(In thousands)	**Oct. 30, 2004**	**Nov. 1, 2003**	**Oct. 30, 2004**	**Nov. 1, 2003**
Net income	$ 31,854	$ 36,161	$ 96,596	$ 97,755
Fair value adjustment-derivative cash flow hedging instrument	126	41	762	385
Income tax expense	(48)	(16)	(293)	(148)
Fair value adjustment, net of tax	78	25	469	237
Amortization of SFAS No. 133 cumulative effect	(10)	6	(2)	18
Income tax expense	4	(3)	1	(7)
Amortization of SFAS No. 133 cumulative effect, net of tax	(6)	3	(1)	11
Total comprehensive income	$ 31,926	$ 36,189	$ 97,064	$ 98,003

The cumulative effect recorded in accumulated other comprehensive loss is being amortized to expense over the remaining lives of the related interest rate swaps.

Share Repurchase Program

In November 2002, the Company s Board of Directors authorized the repurchase of up to $200.0 million of the Company s common stock. Stock repurchases may be made until November 2005 in either the open market or through privately negotiated transactions. During the 13 and 39 weeks ended October 30, 2004, the Company repurchased 693,253 and 1,809,953 shares for approximately $16.8 million and $48.6 million, respectively, under this plan. As of October 30, 2004 cumulative stock repurchases under this plan, totaled 3,075,353 shares for approximately $86.7 million.

6. Closing of Woodridge Distribution Center

In June 2004, the Company closed its distribution center in Woodridge, Illinois and transitioned those operations to a new facility in Joliet, Illinois. The lease for the Woodridge facility expires in June 2005. The Company accounts for vacated lease facilities in accordance with SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities. Accordingly, in the 39 weeks

ended October 30, 2004, the Company recorded a $1.1 million charge, representing the present value of the total remaining rent and other occupancy costs directly related to the lease of the vacated Woodridge facility, which is included in selling, general and administrative expenses.

7. Litigation Matters

The Company has been named in three suits filed in California State Court related to employment matters for its California store employees. The Company is currently unable to estimate the potential liability under certain of these suits. The Company intends to vigorously defend all these lawsuits. The Company does not believe that these suits, individually or in the aggregate, will have an adverse affect on its business operations or condition. However, the Company can give no assurance that these suits, individually or in the aggregate, will not have an adverse affect on its results of operations, accrued liabilities and cash.

Table of Contents

Item 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

INTRODUCTORY NOTE: Unless otherwise stated, references to we, our and us generally refer to Dollar Tree Stores, Inc. and its direct and indirect subsidiaries on a consolidated basis.

A WARNING ABOUT FORWARD-LOOKING STATEMENTS: This document contains forward-looking statements as that term is used in the Private Securities Litigation Reform Act of 1995. Forward-looking statements address future events, developments or results and typically use words such as believe, anticipate, expect, intend, plan, view, target or estimate. For example, our forward-looking statements include statements regarding:

- the average size of our stores to be added in 2004 and beyond;
- the possible effect of inflation and other economic changes on our future costs and profitability, including the possible effect of future changes in fuel costs and trans-Pacific freight rates;
- our cash needs, including our ability to fund our future capital expenditures and working capital requirements;
- the capabilities of our inventory supply chain technology and other new systems;
- the impact, capacity, performance and cost of our existing distribution centers;
- costs of pending and possible future legal claims;
- the adequacy of our internal financial reporting controls;
- the possible effect on our financial results of changes in generally accepted accounting principles relating to accounting for stock-based compensation.

For a discussion of the risks, uncertainties and assumptions that could affect our future events, developments or results, you should carefully review the risk factors described below and in Management s Discussion and Analysis of Financial Condition and Results of Operations and Business sections in our Annual Report on Form 10-K filed April 13, 2004:

- We could fail to meet our goals for opening or expanding stores on a timely basis, which could cause our sales to suffer. We may not anticipate all the challenges that expanding our operations will impose and, as a result, we may not meet our targets for opening new stores and expanding profitably. In addition, new stores or expanded stores will cause sales at nearby stores to suffer, and we could have difficulties profitably renewing or replacing expiring leases.
- The resolution of certain legal matters discussed in Part II, Item 1, of this Form 10-Q, could have a material adverse affect on our results of operations, accrued liabilities and cash.
- Adverse economic conditions, such as reduced consumer confidence and spending due to inflation or other factors, or bad weather could significantly reduce our sales. The outbreak of war and other national and international events, such as

terrorism, could lead to disruptions in the economy.

Our profitability is vulnerable to future increases in operating and merchandise costs including shipping rates, freight costs, fuel costs, wage levels, inflation, competition and other adverse economic factors because we sell goods at the fixed $1.00 price point.

Table of Contents

Our merchandise mix relies heavily on imported goods. An increase in the cost of these goods, for example because of inflation in their country of origin or currency revaluations, or disruption in the flow of these goods may significantly decrease our sales and profits because any transition to alternative sources may not occur in time to meet our demands. In addition, products and alternative sources may also be of lesser quality and more expensive than those we currently import.

Our sales may be below expectations during the Christmas selling season, which may cause our operating results to suffer materially.

The performance of our distribution system is critical to our operations. Unforeseen disruptions or costs in operating and expanding our receiving and distribution systems could harm our sales and profitability.

Disruptions in the availability of quality, low-cost merchandise in sufficient quantities to maintain our growth may reduce sales and profits.

Our forward-looking statements could be wrong in light of these and other risks, uncertainties and assumptions. The future events, developments or results described in this report could turn out to be materially different. We have no obligation to publicly update or revise our forward-looking statements after the date of this quarterly report and you should not expect us to do so.

Investors should also be aware that while we do, from time to time, communicate with securities analysts and others, it is against our policy to selectively disclose to them any material nonpublic information or other confidential commercial information. Accordingly, shareholders should not assume that we agree with any statement or report issued by any analyst regardless of the content of the statement or report, as we have a policy against confirming information issued by others. Thus, to the extent that reports issued by securities analysts contain any projections, forecasts or opinions, such reports are not our responsibility.

Overview

Our net sales are derived from the sale of merchandise. Two major factors tend to affect our net sales trends. First is our success at opening new stores or adding new stores through mergers or acquisitions. Second is the performance of stores once they are open. Sales vary at our existing stores from one year to the next. We refer to this change as a change in comparable store net sales, because we compare only those stores that are open throughout both of the periods being compared. We include sales from stores expanded during the period in the calculation of comparable store net sales, which has the effect of increasing our comparable store net sales. The term expanded also includes stores that are relocated.

At October 30, 2004 we operated 2,674 stores in 48 states, with 19.6 million selling square feet compared to 2,511 stores with 16.6 million square feet at November 1, 2003. During the 39 weeks ended October 30, 2004, we opened 181 stores, expanded 110 stores and closed 20 stores, compared to 166 stores opened, 100 Greenbacks stores added, 110 stores expanded and 27 stores closed during the 39 weeks ended November 1, 2003. The number of new store openings in 2004 has been less than we planned through October 30, 2004; however, we met our 20% square footage growth target for fiscal year end 2004 prior to Thanksgiving. New store openings have occurred later in the year than previously planned, which has reduced our expected sales for fiscal 2004. In the 13 and 39 weeks ended October 30, 2004, we added approximately 0.9 million and 2.7 million selling square feet, respectively, of which approximately 0.3 million and 0.8 million, respectively, were added through expanding existing stores. The average selling square feet of stores opened during the 13 and 39 weeks ended October 30, 2004 was approximately 11,000 square feet. For the remainder of 2004 and beyond, we continue to plan to open stores that have approximately 10,000 to 15,000 selling square feet. These stores generate higher sales and operating income per store than our smaller stores and we believe that they create an improved shopping environment that invites customers to shop longer and buy more.

Table of Contents

Our point-of-sale technology provides us with valuable sales information to assist our buyers and to improve merchandise allocation to the stores. We believe that it will enable us to better control our inventory, which will result in more efficient distribution and store operations. During the first half of fiscal 2004, we completed the roll-out of our point-of-sale systems to most of our stores.

For the 13 and 39 weeks ended October 30, 2004 we have experienced slight increases in comparable store net sales of 0.7% and 0.2%, respectively. If not for the positive effect of relocated stores, our comparable store net sales results would have been negative. Our stores between 10,000 and 15,000 square feet continue to produce our best comparable store net sales results.

We expect our trans-Pacific shipping rates to increase by approximately $4.0 million in 2004. While fuel costs have risen in 2004 and our mileage costs as charged by our domestic carriers are increasing compared to prior years, we do not expect these costs to have a material impact on our results of operations, in part, because of the opening of two new distribution centers in the current year which has reduced the average distance between our distribution centers and the stores that they service.

Results of Operations

13 Weeks Ended October 30, 2004 Compared to The 13 Weeks Ended November 1, 2003

Net sales. Net sales increased 8.8%, or $58.8 million, resulting from sales in our new and relocated stores, which continue to be in the 10,000-15,000 square footage range and an increase of 0.7% in comparable store net sales in the current quarter. Comparable store net sales are positively affected by our expanded and relocated stores, which we include in the calculation, and, to a lesser extent, are negatively affected when we open new stores or expand stores near existing stores.

Gross Profit. Gross profit margin decreased to 35.4% in the current quarter compared to 36.6% in the prior year quarter. The decrease was primarily due to the following:

- Merchandise cost, including inbound freight, increased approximately 10 basis points as a result of increased inbound freight costs arising from increases in fuel costs and slightly higher import rates. Partially offsetting the increased freight rates was better pricing on both domestic and import merchandise.

- Markdown expense increased approximately 50 basis points in the period due primarily to hurricane related markdowns in the period and adjustments to decrease the required markdown reserve in the prior year third quarter.

- Shrink expense increased approximately 30 basis points primarily due to an adjustment reducing the shrink reserve in the prior year third quarter to reflect actual physical inventory results. This adjustment was recorded in the second quarter in the current year.

- Occupancy costs increased approximately 30 basis points due to decreased leverage associated with a low comparable store net sales increase.

Selling, General and Administrative Expenses. Selling, general, and administrative expenses for the current period increased to 28.0%, as a percentage of net sales, compared to 27.5% in for the same period last year. This increase was primarily due to the following:

Depreciation costs increased approximately 30 basis points in the quarter as a result of our larger new and expanded stores and the continued installation of our point-of-sale systems and other technology assets.

Store operating costs increased approximately 20 basis points in the current period, primarily due to decreased leverage associated with a low comparable store net sales increase and increased repairs and maintenance costs due primarily to hurricane damage.

Advertising costs increased approximately 20 basis points in the current period due to a fall advertising campaign in 2004. We employed small levels of electronic advertisements during the comparable prior year period.

Table of Contents

These increases were partially offset by an approximate 10 basis point decrease in store payroll costs in the current period due to improved field management.

Operating Income. Due to the reasons discussed above, operating income decreased as a percentage of net sales to 7.4% in the third quarter of 2004 compared to 9.1% in the same period of 2003.

39 Weeks Ended October 30, 2004 Compared to The 39 Weeks Ended November 1, 2003

Net sales. Net sales increased 12.2%, or $231.7 million resulting from sales in our new and relocated stores and a slight increase of 0.2% in comparable store sales in the current period. Comparable store net sales are positively affected by our expanded and relocated stores, which we include in the calculation, and, to a lesser extent, are negatively affected when we open new stores or expand stores near existing stores.

Gross Profit. Gross profit margin decreased to 35.4% in the current period compared to 35.8% for the prior year period. The decrease is primarily due to the following:

Merchandise cost, including inbound freight, increased 10 basis points as a percentage of sales for the period as compared to prior year. Increases in inbound freight costs and increases in domestic purchases, which historically have a higher cost than import purchases, were partially offset by better pricing on both domestic and import merchandise. The increase in inbound freight costs is due primarily to higher fuel costs and higher import rates. The increase in domestic purchases is due to our buying a higher proportion of consumable merchandise for our larger stores.

Markdown expense increased approximately 10 basis points due primarily to hurricane related markdowns in the third quarter of 2004 and adjustments to decrease the required markdown reserve in the prior year.

Occupancy costs increased approximately 40 basis point due to decreased leverage associated with the low comparable store net sales increase.

Partially offsetting these increases was an approximate 25 basis point decrease in shrink expense due to the overall improvement in the shrink rate in the current year.

Selling, General and Administrative Expenses. Selling, general, and administrative expenses for the current period increased to 27.8%, as a percentage of net sales, compared to 27.3% in for the same period last year. The increase is primarily due to the following:

Depreciation costs increased approximately 30 basis points in the period as a result of our larger new and expanded stores, the continued installation of our point-of-sale systems and other technology assets.

Store operating costs increased approximately 20 basis points, primarily due to decreased leverage associated with a low comparable store net sales increase.

These increases were partially offset by an approximate 10 basis point decrease in store payroll costs in the current period due to improved field management.

Operating Income. Due to the reasons discussed above, operating income decreased as a percentage of net sales to 7.5% for the 39 weeks ended October 30, 2004 compared to 8.5% for the 39 weeks ended November 1, 2003.

Interest Expense, net. Interest expense, net increased to $4.2 million in the current period compared to $3.5 million last year due primarily to $0.7 million of deferred financing costs that were charged to interest expense as a result of the refinancing of the $150.0 million credit facility and the repayment of the $142.6 million of variable rate debt in March 2004.

Liquidity and Capital Resources

Our business requires capital to open new stores, expand our distribution network and

Table of Contents

operate existing stores. Our working capital requirements for existing stores are seasonal in nature and typically reach their peak in the months of September and October. Historically, we have satisfied our seasonal working capital requirements for existing stores and funded our store opening and expansion programs from internally generated funds and borrowings under our credit facilities.

The following table compares cash flow information for the 39 weeks ended October 30, 2004 and November 1, 2003:

	39 Weeks Ended	
	Oct. 30, 2004	Nov. 1, 2003
Net cash provided by (used in):		
Operating activities	$ 11.6	$ 5.7
Investing activities	(151.9)	(217.7)
Financing activities	59.5	41.8

The $5.9 million increase in cash provided by operating activities was primarily the result of better payables management and increased earnings before depreciation and amortization and other non-cash items. These increases were offset by increased inventory levels due primarily to later store openings in the current year.

The $65.8 million decrease in cash used in investing activities was primarily the result of a decrease in capital expenditures due to higher expenditures in the prior year on our distribution center projects that were completed in the first half of fiscal 2004 and later store openings in the current year. In addition, in the prior year, we used the proceeds received from the sale of our short-term investments to pay for the purchase of Greenbacks, Inc.

The $17.7 million increase in cash provided by financing activities was primarily the result of borrowings under our credit facility, net of the repayment of our variable rate debt for our distribution centers. This increase was partially offset by $48.6 million in stock repurchases in the 39 weeks ended October 30, 2004 under a $200 million authorization granted by our Board of Directors in November 2002.

In March 2004, we entered into a five-year $450.0 million Revolving Credit Facility, including up to $50.0 million available for letters of credit. This facility bears interest at LIBOR, plus a 0.475% spread. We used availability under this facility to repay $142.6 million of variable rate debt related to our distribution centers and to invest in short-term government-sponsored municipal bonds. As of October 30, 2004 we had $250.0 million outstanding under this facility.

We also have a $125.0 million Letter of Credit Reimbursement and Security Agreement, under which approximately $68.1 million was committed to letters of credit issued for routine purchases of imported merchandise as of October 30, 2004.

Expected Future Accounting Pronouncements

In March 2004, the Financial Accounting Standards Board issued an exposure draft addressing the accounting for stock-based compensation. A final standard is expected in the near future. Proposed changes to the existing rules require companies to recognize compensation expense for stock option grants. When the new rules are enacted, we expect our results of operations to be adversely affected; however, our cash flow and the underlying economics of our financial condition are not expected to be materially affected. We will continue to monitor the development of the new standard and review our stock-based compensation plans accordingly.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

We are exposed to various types of market risk in the normal course of our business, including the impact of interest rate changes and foreign currency rate fluctuations. We may enter into interest rate swaps to manage our exposure to interest rate changes, and we may employ other risk management strategies, including the use of foreign currency forward contracts. We do not enter into derivative instruments for any purpose other than cash flow hedging purposes. One of our interest rate swaps does not qualify for hedge accounting treatment under SFAS No. 133, as amended by SFAS No. 138, because it contains provisions that knockout the swap when the variable interest rate exceeds a predetermined rate.

Interest Rate Risk

The following table summarizes the financial terms and fair values of each of our interest rate swap agreements at October 30, 2004:

Hedging Instrument	Receive Variable	Pay Fixed	Knockout Rate	Expiration	Fair Value Asset (Liability)
$19.0 million interest rate	LIBOR	4.88%	7.75%	4/1/2009	$ (1,262,037)
$25.0 million interest rate	LIBOR	5.43%	N/A	3/12/2006	$ (1,004,680)

Due to the many variables involved in determining the fair value, management is not able to predict the changes in fair value of our interest rate swaps. The fair values are the estimated amounts we would pay or receive to terminate the agreements as of the reporting date. These fair values are obtained from an outside financial institution.

During the first quarter of 2004, we refinanced our debt facilities and in June of 2004 our $10.0 million and $5.0 million interest rate swaps expired. In spite of the refinancing and the expiration of these swap agreements, we do not believe there have been any material changes in our interest rate risk exposure.

Item 4. CONTROLS AND PROCEDURES.

(a) Evaluation of disclosure controls and procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our management, including our Chief Executive Office and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Pursuant to SEC Rule 13a-15, effective as of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that as of the date of our evaluation, our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) Changes in internal controls

During the period covered by this report, there have been no significant changes in our internal controls over financial reporting that have materially affected, or are reasonably

Table of Contents

likely to materially affect, our internal controls over financial reporting. In accordance with Section 404 of the Sarbanes-Oxley Act of 2002, we are evaluating our internal controls and are in the process of making changes to improve the effectiveness of our internal control structure.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS.

From time to time we are defendants in ordinary, routine litigation and proceedings incidental to our business, including:

- employment-related matters;
- product safety matters, including product recalls by the Consumer Products Safety Commission;
- personal injury claims; and
- the infringement of the intellectual property rights of others.

On July 11, 2001, a complaint was filed in California state court by several employees who allege that our store managers in California should have been classified as non-exempt employees under California law. Therefore, they allege, our store managers should have received overtime compensation. The suit requests that the court certify the case as a class action on behalf of all California store managers, assistant managers and merchandise managers and, among other things, award overtime compensation to these managers from July 11, 1997 through the end of the case. We currently operate 195 stores in California.

On September 19, 2002, a complaint was filed in Alabama Federal Court by a former store manager who alleges that all of our store managers should have been classified as non-exempt employees under the Fair Labor Standards Act. This suit requested that the Alabama Federal Court certify the case as a collective action on behalf of all salaried managers in all our stores and, among other things, award overtime compensation to these managers from September 19, 1999 (or earlier) through the end of the case. This suit has been recently settled for an insignificant amount and the settlement will have no adverse effect on our results of operations or accrued liabilities.

On November 3, 2003, a complaint was filed in California state court by several employees who allege that our California store employees failed to receive meal period breaks and paid rest periods as required by California law. The suit requests that the California state court certify the case as a class action on behalf of all California store employees. Among other things, the suit requests the court to award each of these employees one hour of pay for each meal period break they failed to receive in accordance with law plus one hour of pay for any day in which they failed to receive all rest breaks as required by law. The suit asks that damages be awarded for the period from October 1, 2000 through the end of the case. After the suit was filed, the first California law suit originally filed on July 11, 2001, was amended to include a meal period and rest break claim for our California store managers, assistant managers and merchandise managers.

On July 30, 2004, a complaint was filed in California state court by several current and former employees who allege that our store managers and assistant managers in California should have been classified as non-exempt, hourly employees under California law.

Therefore, they allege, these employees should have received overtime compensation and should have taken rest and meal period breaks. The suit seeks to have the court certify the case as a class action on behalf of all California store employees who were misclassified as exempt, salaried employees, were denied rest and meal period breaks, or were required to work off the clock and, among other things, award overtime compensation to these employees and compensatory and punitive damages.

Table of Contents

We will vigorously defend ourselves in all these law suits. We do not believe that these suits, individually or in the aggregate, will have an adverse affect on our business operations or condition. However, we can give no assurance that these suits, individually or in the aggregate, will not have an adverse affect on our results of operations, accrued liabilities and cash.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

The following table presents our share repurchase activity for the 13 weeks ended October 30, 2004.

ISSUER PURCHASES OF EQUITY SECURITIES (1)

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Approximate dollar value of shares that may yet be purchased under the plans or programs (in thousands)
August 1, 2004 to August 28, 2004	580,000	$ 23.98	580,000	$ 116,200
August 29, 2004 to October 2, 2004	35,000	23.99	35,000	115,300
October 3, 2004 to October 30, 2004	78,253	25.56	78,253	113,300
Total	693,253	$ 24.19	693,253	

(1) In November 2002, our Board of Directors authorized the repurchase of up to $200 million of our common stock.

Item 3. DEFAULTS UPON SENIOR SECURITIES.

None.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

Item 5. OTHER INFORMATION.

None.

Item 6. EXHIBITS.

10. Material Contracts

    10.1 Form of Standard Restricted Stock Unit Award Agreement for use under the Dollar Tree Stores, Inc. 2003 Equity Incentive Plan (EIP) and the Dollar Tree Stores, Inc. 2004 Executive Officer Equity Plan (EOEP) (filed herewith).

    10.2 Form of Standard Option Award Agreement for use under the EIP and the EOEP (filed herewith).

    10.3 Policy for Director Compensation approved by the Board of Directors of Dollar Tree Stores, Inc. on September 21, 2004 (filed herewith).

31. Certifications required under Section 302 of the Sarbanes-Oxley Act

    31.1 Certification required under Section 302 of the Sarbanes-Oxley Act of Chief Executive Officer

    31.2 Certification required under Section 302 of the Sarbanes-Oxley Act of Chief Financial Officer

32. Certifications required under Section 906 of the Sarbanes-Oxley Act

    32.1 Certification required under Section 906 of the Sarbanes-Oxley Act of Chief Executive Officer

    32.2 Certification required under Section 906 of the Sarbanes-Oxley Act of Chief Financial Officer
